	<p>A Objective</p> <p>This standard specifies the accreditation requirements for all certification bodies operating FSC accredited certification programs. The objective of this standard is to ensure that these programs are managed in a competent, consistent, impartial, transparent, rigorous, reliable and credible manner, thereby facilitating their acceptance on a national and international basis and so furthering international trade and promoting sustainable development.</p>	<p>Foreword</p> <p><i>ISO/IEC Guide 65: 1996 (E) General requirements for bodies operating product certification systems</i> is widely recognised as the most appropriate international standard for certification bodies operating product certification systems. The term 'product' in this context includes processes and services, and therefore covers the certification of forest management as well as forest product manufacturing processes against specified standards and other normative documents.</p>

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	<p>This standard was developed to ensure conformity with applicable requirements of the <i>ISEAL Code of Good Practice for Assuring Compliance with Social and Environmental Standards V1-0</i> and compatibility with <i>DIN EN ISO/IEC standard 17065:2013-01 Conformity assessment – requirements for bodies certifying products, processes and services</i>.</p>	<p>Governments and businesses increasingly reference certification body conformity with ISO/IEC Guide 65: 1996 (E) as a major requirement of a credible, international certification scheme.</p> <p>The introduction to ISO/IEC Guide 65: 1996 (E) explains that its requirements are written "above all, to be considered as general criteria for organizations operating product certification systems; they may have to be amplified when specific industrial or other sectors make use of them..." (ISO/IEC Guide 65: 1996 (E)). In the case of certification of forest management FSC provides such amplification in order to address the technical challenges of assessing large areas of land which may provide homes and livelihoods for a wide variety of people, habitat for rare and endangered plants and animals, and basic environmental services in the surrounding area. In the case of chain of custody certification for the purpose of labeling and of making claims about the origin of raw materials used, the credibility of the scheme and consumer confidence are paramount. FSC has therefore developed additional requirements related to transparency and stakeholder consultation that are essential to meet these expectations.</p> <p>FSC-STD-20-001 specifies the requirements for all certification bodies operating FSC certification programs. The objective of the standard is to ensure that certification bodies operating schemes for the certification of forest management and the social and/or environmental labeling of forest products operate in a consistent, reliable and credible manner thereby facilitating their acceptance on a national and international basis and so furthering international trade and promoting sustainable development.</p> <p>FSC-STD-20-001 is for use by all certification bodies operating schemes for the certification of forest management, chain of custody, and controlled wood evaluations for forest management enterprises.</p>
	<p>B Scope</p> <p>This standard is for use by all certification bodies operating programs for the FSC certification of forest management, chain of custody and controlled wood against FSC standards.</p>	<p>A Scope</p> <p>This International Standard contains principles and requirements for the competence, consistency and impartiality of the assessment and FSC certification of forest management, chain of custody and controlled wood operations and for certification bodies wishing to provide or to maintain</p>

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	<p>All aspects of this standard are considered to be normative, including the scope, standard effective date, references, terms and definitions, notes, tables and annexes, unless otherwise stated (e.g. a text box indicated as being informative).</p>	<p>these activities.</p> <p>This International Standard shall be used as a normative document for FSC accreditation.</p> <p>Note on use of this standard</p> <p>All aspects of this standard are considered to be normative, including the scope, standard effective date, references, terms and definitions, notes, tables and annexes, unless otherwise stated (e.g. as examples).</p> <p><i>In the absence of FSC requirements or guidance (in the form of approved FSC Policies, Standards, Directives, Guidance or Advice Notes) users should follow IAF guidance on the interpretation of ISO/IEC Guide 65.</i></p>
	<p>C Effective and validity dates</p> <p>Approval date 09 November 2015</p> <p>Publication date 15 December 2015</p> <p>Effective date 01 April 2016</p> <p>Transition phase* 01 April 2016 – 31 March 2017</p> <p>Period of validity until replaced or withdrawn</p> <p>*NOTE: Certification bodies shall adapt their FSC accredited certification programs (as needed) to ensure conformity with this version of the standard by the end of the transition phase.</p>	<p>B Standard effective date</p> <p>This standard becomes effective on 01 January 2010.</p> <p>New applicant certification bodies that apply for accreditation after the effective date of this standard shall be audited against the requirements of this standard.</p> <p>Existing applicant certification bodies in the process of accreditation at the effective date shall switch to the requirements of this standard before accreditation is granted.</p> <p>FSC accredited certification bodies shall be in compliance with the requirements of this standard by 01 January 2011.</p>

	<p>FSC normative documents replaced by this version of the standard: <i>FSC-ADV-20-001-02 Maximum timeline for certification decisions</i> <i>FSC-ADV-20-004 Qualification of FSC certification body auditors</i> <i>FSC-ADV-20-481 Documenting the forest areas that the certification body has been contracted to evaluate for conformity with FSC standards</i></p>	
	<p>E Terms and definitions</p> <p>For the purposes of this standard, the terms and definitions provided in <i>FSC-STD-01-002 FSC Glossary of Terms, ISO/IEC 17000:2004</i>, and the following apply:</p>	<p>D Terms and definitions</p> <p>For the purposes of this International Standard, the terms and definitions given in <i>FSC-STD-01-002 FSC Glossary of Terms, ISO/IEC 17000:2004</i>, and the following apply:</p>
	<p>Accreditation: Third-party attestation that a certification body has formally demonstrated that its established systems are capable of performing a specified type(s) of conformity assessment in accordance with applicable scheme-owner requirements.</p>	
	<p>Appeal: request by the client to the certification body for reconsideration of a decision it has made relating to that client.</p>	<p>Appeal: request by the client to the certification body for reconsideration of a decision it has made relating to that client.</p>
	<p>Application reviewer: the person(s) that is (are) responsible for the application review, prepares the audit process and checks if an applicant for certification appears to be ready and prepared for an audit.</p>	
	<p>Audit: systematic, independent, documented process for obtaining records, statements of fact and other relevant information and assessing them objectively to determine the extent to which applicable requirements are fulfilled (adapted from ISEAL Assurance Code).</p>	
	<p>Auditor: a person competent to conduct an audit.</p>	
	<p>Audit team: is made up of one or more auditors, one of whom is appointed to be the audit team leader. When necessary, audit teams are also supported by technical experts and/or further personnel (e.g. interpreter), who assist auditors but do not themselves act as auditors.</p>	
	<p>Audit team leader: an auditor who is competent to lead the audit and the audit team.</p>	
	<p>Certificate: a document issued under the rules of a certification system, indicating that adequate confidence is provided that a duly identified product, process or service is in conformity with a specific standard or other normative document (ISO/IEC Guide 2:1991 paragraph 14.8 and</p>	

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	ISO/CASCO 193 paragraph 4.5).	
	Certification: third-party attestation related to products, processes, systems or persons.	Certification: third-party attestation related to products, processes, systems or persons.
	Certification body: body that performs conformity assessment services and that can be the object of accreditation (adapted from ISO/IEC 17011:2004 (E)).	<u>FSC-STD-01-002 Glossary of Terms</u> Conformity Assessment Body (CAB) (also referred to as Certification Body) Body that performs conformity assessment services and that can be the object of accreditation (adapted from ISO/IEC 17011:2004 (E)).
	Certification decision: granting, maintaining, renewing, expanding the scope of, reducing the scope of, suspending, reinstating, or withdrawing certification.	Certification decision: granting, maintaining, renewing, expanding the scope of, reducing the scope of, suspending, reinstating, or withdrawing certification.
	Certification decision making entity: the person(s), group or committee who makes the final certification decision.	
	Client: applicants for FSC certification and FSC certified organizations.	Client: term used in this standard synonymous to “supplier” as used in ISO/IEC Guide 65 (see below). In the context of this standard client refers to applicants for FSC certification and to FSC certificate holders.
	Competence: the demonstrated ability to apply knowledge, skills and personal attributes in order to achieve intended results (adapted from DIN EN ISO/IEC 17065:2013-01).	
	Complaint: expression of dissatisfaction by any person or organization presented to a certification body relating to the FSC activities of that certification body and/ or the FSC activities of their clients (adapted from ISO/IEC 17000:2004 (E)). In the context of FSC, a complaint includes the name and contact information of the complainant, a clear description of the issue and evidence to support each element or aspect of the complaint.	Complaint: expression of dissatisfaction, other than appeal, by any person or organization to a certification body, relating to the activities of that body, where a response is expected.
	Conflict of interest: situation in which a party has an actual or perceived interest that gives, or could have the appearance of giving, that party an incentive for personal, organizational, or professional gain, such that the party’s interest could conflict, or be perceived to conflict with, the conduct of an impartial and objective certification process.	
	Consultancy: participation in i. the designing, manufacturing, installing, maintaining or distributing of a certified product or a product to be certified; or ii. designing, implementing, operating or maintaining of a certified process or a process to be certified; or iii. the designing, implementing, providing or maintaining of a	Consultancy: Participation in a) designing, manufacturing, installing or maintaining of a product to be certified; b) designing, implementing, providing or maintaining of a service to be certified;

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	<p>iv. certified service or a service to be certified; or the designing, implementing or maintaining of a certified management system or a management system to be certified.</p> <p>NOTE 1: Arranging training and participating as a trainer is not considered consultancy, provided that, where the course relates to management systems or auditing, it is confined to the provision of generic information that is freely available in the public domain; i.e. the trainer should not provide company-specific solutions, or conduct one-on-one trainings.</p> <p>NOTE 2: The certification body is allowed to explain its findings and/or clarify the requirements of normative documents but shall not give prescriptive advice or consultancy as part of an audit.</p>	<p>c) designing, implementing, operating or maintaining of a process to be certified.</p>
	<p>Days: timelines mentioned in this standard in days refer to business days unless otherwise specified.</p>	<p>Days: timelines mentioned in this standard in days refer to calendar days unless otherwise specified.</p>
	<p>Evaluation: the combined processes of audit, review, and decision on a client's conformity with the requirements of a standard (ISEAL Assurance Code).</p>	<p>Evaluation: systematic examination of the extent to which a product, process or service fulfils specified requirements (term used in ISO/IEC Guide 65).</p>
	<p>Types of evaluation:</p> <p>Pre-Evaluation: assessment to determine the applicant's readiness for their main evaluation.</p> <p>Main Evaluation: assessment of an applicant for FSC certification.</p> <p>Re-Evaluation: assessment for re-certification.</p> <p>Surveillance Evaluations: see "surveillance"</p> <p>NOTE: The certification body may also conduct other types of evaluations in addition to the ones listed above, e.g., corrective action request and pre-condition verification audits, expansion of scope evaluations, certification transfer evaluation.</p>	<p>Types of evaluation:</p> <p>Pre-Evaluation: assessment to determine the applicant's readiness for their main evaluation.</p> <p>Main Evaluation: assessment of an applicant for FSC certification.</p> <p>Re-Evaluation: assessment for re-certification.</p> <p>Surveillance evaluations: see "surveillance"</p> <p>FSC-STD-20-011 V2-0:</p> <p>NOTE: The certification body may also conduct other types of evaluations in addition to the ones listed above, e.g., Corrective Action Request (CAR) and pre-condition verification audits, expansion of scope evaluations, certificate transfer evaluation.</p>

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	<p>FSC: if used in this standard without any further designation such as “IC” or “GD”, it is used as a general term referring to all operational entities under the ownership of Forest Stewardship Council A.C, excluding the FSC accreditation body “Accreditation Services International” (ASI).</p>	<p>FSC: if used in this standard without any further designation such as “IC” or “GD”, it is used as a general term referring to all operational entities under the ownership of Forest Stewardship Council A.C., including ASI (Accreditation Services International), responsible for managing the FSC Accreditation Program.</p>
	<p>FSC Accreditation Requirements: all normative rules and regulations applicable to FSC accredited certification bodies and to applicant certification bodies.</p>	
	<p>FSC Certification Requirements: all normative rules and regulations applicable to the certification of forest management organizations and/or chain of custody organizations.</p>	<p>FSC Certification Standards: all FSC Rules and Regulations as amended and re-issued from time to time in relation to the certification of forest management enterprises and/or of forest products enterprises.</p>
	<p>FSC Normative Framework: the collection of FSC Policies, Standards, and Procedures which are mandatory for FSC accredited certification bodies, certificate holders, and applicants (and any other party as specified in a document’s scope) to be followed. Includes Advice Notes where these exist (stand-alone or compiled in Directives).</p>	<p>FSC Rules and Regulations: FSC Principles and Criteria, FSC Procedures, FSC Policies, FSC Certification Standards, FSC Trademark Requirements, the FSC Dispute Resolution System, Guidance, Directives & Advice Notes and any other FSC documentation.</p>
		<p>Intellectual Property Rights: any and all rights to copyright, typography, databases, designs, patents, trade or service marks, know-how and all other intellectual property, any and all proprietary or other rights (whether or not any of the same are registered or registerable, and including any applications or rights to apply for registration of any of the same) which may exist anywhere and in any form worldwide.</p>
	<p>Impartiality: actual and perceived presence of objectivity, meaning that conflicts of interest do not exist or are resolved so as not to adversely influence subsequent activities of the certification body.</p>	
	<p>License Agreement for the FSC Certification Scheme: an agreement, that each applicant for FSC certification and/or FSC certificate holder has to enter into with FSC Global Development, in order to be eligible for FSC certification.</p>	<p>License Agreement for the FSC Certification Scheme: an agreement that each applicant for FSC Certification and/or FSC Certificate Holder has to enter into with FSC Global Development in order to be eligible for FSC Certification. The License Agreement for the FSC Certification Scheme authorizes the use of the FSC trademarks under specified terms and provisions.</p>
	<p>Operational procedure: describes the processes used to effectively meet the objective of the activity (e.g. who, what, when, where, why).</p>	
	<p>Peer reviewer: an external person (auditor or technical expert) reviewing an audit report.</p>	
	<p>Personnel: In the context of this standard this includes any person working</p>	

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	under an individual contract or formal agreement for the certification body that places them under the authority and direct control of the certification body.	
		Outsourcing: subcontracting a process or part of a process which has been accredited by FSC to a third-party (see <i>Subcontractor</i>).
		Related Body: a related body is one which is linked to the certification body by common ownership in whole or part, common directors, contractual arrangement, a common name, informal understanding or other means such that the related body has a vested interest in any certification decision or has a potential ability to influence the process (adapted from IAF GD 5:2006).
		Subcontractor (affiliate, partner organization of a certification body): An organization or individual with which/ whom the certification body has established a formal relationship ⁽¹⁾ to collaborate in providing all or any part of FSC accredited certification services ⁽²⁾ to their clients ⁽³⁾ . (1) A contract or agreement has been signed by both parties. (2) Services shall not include certification decision making. (3) Individuals working under formal agreement for the certification body, within the accredited systems, and under the authority and direct control of the certification body are not deemed to be subcontractors.
		Supplier: the party that is responsible for ensuring that products (incl. services) meet and, if applicable, continue to meet, the requirements on which the certification is based (term used in ISO/IEC Guide 65). In this FSC standard, the term “ <i>client</i> ” is introduced instead, as this is the new term for applicants for certification and certificate holders in latest ISO publications.
	Surveillance: systematic repetition of conformity assessment activities as a basis for maintaining the validity of FSC certification.	Surveillance: systematic iteration of conformity assessment activities as a basis for maintaining the validity of FSC certification.
	Suspension: temporary invalidation of the FSC certification for all or part of the specified scope of attestation.	Suspension: temporary invalidation of the FSC certification for all or part of the specified scope of attestation.
	Technical expert: a person supporting an audit team by providing specific knowledge or expertise about a specific sector, content, process or activity being audited. The person does not act as auditor.	
	Termination: revocation or cancellation of the certification agreement by	Termination: revocation or cancellation of the certification contract by

	operating procedures of the certification body or other mandatory requirements should not be followed. Management should document the reasoning behind the decision to not follow the recommendations and maintain the document for review by ASI.	
	<p>1.6 Liability and financing</p> <p>1.6.1 The certification body shall be able to demonstrate that it has:</p> <ul style="list-style-type: none"> a) evaluated the risks arising from its certification activities, and b) that it has adequate arrangements (e.g. insurance or reserves) to cover liabilities arising from its operations in each of its fields of activities and the geographic areas in which it operates. 	<p>3.6 FSC specification to ISO/IEC Guide 65: 1996 (E) Clause 4.2 h) The certification body shall be able to demonstrate that it has evaluated the risks arising from its certification activities and that it has adequate arrangements (e.g. insurance or reserves) to cover liabilities arising from its operations in each of its fields of activities and the geographic areas in which it operates.</p>
	1.6.2 The certification body shall have the financial stability and resources required for its operations.	<p>ISO/IEC Guide 65:1996 4.2 i) have the financial stability and resources required for the operation of a certification system;</p>
	<p>1.7 Non-discriminatory conditions</p> <p>1.7.1 The policies and procedures under which the certification body operates, and the administration of them, shall be non-discriminatory. Procedures shall not be used to impede or inhibit access to the certification process by clients, other than as provided for in FSC requirements.</p>	<p>ISO/IEC Guide 65:1996 4.1.1 The policies and procedures under which the certification body operates and their administration shall be non-discriminatory and shall be administered in a non-discriminatory manner. Procedures shall not be used to impede or inhibit access by applicants, other than as provided for in this Guide.</p>
	1.7.2 Access to the certification process shall not be conditional upon the size of the client or membership of any association or group, nor shall certification be conditional upon the number of certifications already issued. There shall not be undue financial or other conditions.	<p>ISO/IEC Guide 65:1996 4.1.2 The certification body shall make its services accessible to all applicants whose activities fall within its declared field of operation. There shall not be undue financial or other conditions. Access shall not be conditional upon the size of the supplier or membership of any association or group, nor shall certification be conditional upon the number of certificates already issued.</p>
	1.7.3 Notwithstanding the requirements of Clauses 1.7.1 and 1.7.2 above, a certification body can deny certification to a client when fundamental and demonstrated reasons exist (e.g. illegal activities).	2.1 Notwithstanding the requirements of ISO/IEC Guide 65 Clause 4 the certification body shall not be obliged to enter into or maintain any commercial or other relationship with any entity or issue or maintain a certificate previously issued to any entity whose activities conflict with the obligations of the certification body as specified in its accreditation contract with FSC, or which, in the sole opinion of the certification body, reflect badly on the good name of the certification body. The certification body shall include

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
		<p>a specific and legally binding clause to this effect in its contracts with its clients in relation to any services related to FSC or FSC standards.</p> <p>NOTE: A certification body can deny certification to a client when fundamental/ demonstrated reasons exist, such as illegal activities, history of repeated non conformities with the certification requirements and similar issues.</p>
	<p>1.8 Confidentiality</p> <p>1.8.1 The certification body shall be responsible, through legally enforceable commitments, for the management of all information obtained or created during the performance of certification activities. Information is considered proprietary and shall be regarded as confidential, except for information that the client makes or is required to make publicly available, that FSC and ASI are entitled to access, or when agreed between the certification body and the client (e.g. for the purpose of responding to complaints).</p>	<p>ISO/IEC Guide 65:1996</p> <p>4.10.1 The certification body shall have adequate arrangements consistent with applicable laws to safeguard confidentiality of the information obtained in the course of its certification activities at all levels of its organization, including committees and external bodies or individuals acting on its behalf.</p>
	<p>1.8.2 The certification body shall maintain and implement documented policies and procedures for maintenance of confidentiality, including:</p> <ul style="list-style-type: none"> a) a policy statement on confidentiality; b) procedures for ensuring that personnel are aware of the policy and of their consequent obligations; c) a written confidentiality agreement to be signed by all personnel who have access to confidential information. Such personnel shall include but is not limited to: <ul style="list-style-type: none"> i. administrative staff; ii. auditors, technical experts and audit observers; iii. consultants and persons providing outsourced services; iv. certification decision makers; v. peer reviewers; vi. committee members. 	<p>11 Certification body: confidentiality (ISO/IEC Guide 65: 1996 (E) Clause 4.10)</p> <p>11.1 The policies and procedures for maintenance of confidentiality shall include:</p> <ul style="list-style-type: none"> 11.1.1 a policy statement on confidentiality; 11.1.2 procedures for ensuring that personnel are aware of the policy and of their consequent obligations; 11.1.3 a written confidentiality agreement to be signed by all personnel who have access to confidential information. Such personnel include: <ul style="list-style-type: none"> a) administrative staff; b) lead auditors, auditors, technical experts and audit observers; c) consultants and subcontractors; d) certification decision makers; e) peer reviewers; f) committee members.

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	1.8.3 When the certification body is required by law or authorized by contractual arrangements to release confidential information, the client or person concerned shall, unless prohibited by law, be notified of the information provided.	ISO/IEC Guide 65:1996 4.10.2 Except as required in this Guide or by law, information gained in the course of certification activities about a particular product or supplier shall not be disclosed to a third-party without the written consent of the supplier. Where the law requires information to be disclosed to a third-party, the supplier shall be informed of the information provided as permitted by the law.
	1.8.4 Information about the client that is not publicly available and is obtained from sources other than the client (e.g. from a complainant) shall be treated as confidential, unless the source of information and the client give written consent to disclose it.	
	1.9 Complaints and appeals 1.9.1 The certification body shall have a documented procedure to receive, evaluate and make decisions on complaints and appeals, which shall at least include the following elements: a) to allow the aggrieved party the opportunity to present the complaint or appeal to an entity (person(s), group or committee) which must be within the certification body's contractual (e.g. employee) or organizational control (e.g. committee); b) to require the complainant or appellant to include a clear description of the complaint or appeal, objective evidence to support each element or aspect of the complaint or appeal, and the name and contact information of the submitter.	6 Certification body: quality system (ISO/IEC Guide 65: 1996 (E) Clause 4.5) 6.1 The quality manual and associated procedures shall include operational procedures for: m) managing complaints and appeals. 14.2 The procedures shall allow the aggrieved party the opportunity to present the complaint or appeal to an entity (person(s), group or committee) which: 14.2.1 must be within the certification body's contractual (e.g. employee) or organizational control (e.g. committee);
	1.9.2 Summary information about the procedures for submitting and handling complaints and appeals shall be easily accessible on the websites of both the certification body and any bodies providing outsourced services in the local language of the country of operation . For forest management this information shall be publicly available in the same language as the public summary certification report published by the certification body.	14.1 The certification body shall publish summary information about the procedures for submitting complaints and appeals and about the certification body's procedures for handling such complaints and appeals on the certification body's website and make such information available in print on request. This information shall be publicly available in the same languages as the public certification summaries published by the certification body. NOTE: a paragraph in a visible part of a public summary report including the information as required in 14.1 and translated together with the content of the report satisfies the website publication requirements of this clause in relation to its FSC accreditation.
	1.9.3 Upon receipt of a complaint or appeal, the certification body shall confirm whether the complaint or appeal relates to certification	

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	activities for which it is responsible and, if so, shall address it.	
	1.9.4 The certification body shall respond to complaints and appeals in the same language that is used in the public summary certification report, or shall agree with the complainant on the language used.	
	1.9.5 The certification body shall retain the anonymity of the complainant in relation to the client, if this is requested by the complainant.	
	1.9.6 The certification body shall treat anonymous complaints and expressions of dissatisfaction that are not substantiated as complaints as stakeholder comments and address these during the next audit.	
	1.9.7 The certification body shall register all complaints with FSC.	
	1.9.8 The certification body shall be responsible for gathering and verifying all necessary information (as far as possible) to progress the complaint or appeal to a decision.	
	<p>1.9.9 The certification body has the duty of seeking a timely resolution of complaints and appeals, in particular to:</p> <ul style="list-style-type: none"> a) acknowledge receipt of a complaint or appeal; b) provide an initial response, including an outline of the certification body's proposed course of action to follow up on the complaint or appeal, within two (2) weeks of receiving a complaint or appeal; c) keep the complainant(s)/ appellant(s) informed of progress in evaluating the complaint/ appeal; d) investigate the allegations and specify all its proposed actions in conclusion to the complaint or appeal within three (3) months of receiving the complaint or appeal; e) notify the complainant when the complaint is considered to be closed, meaning that the certification body has gathered and verified all necessary information, investigated the allegations, taken a decision on the complaint and responded to the complainant. 	<p>14.2 The procedures shall allow the aggrieved party the opportunity to present the complaint or appeal to an entity (person(s), group or committee) which:</p> <p>14.2.2 has the duty of seeking a timely resolution of complaints or appeals made against the certification body;</p> <p>NOTE: The duty to seek <i>timely</i> resolution is emphasized. The certification body shall provide an initial response, including an outline of the certification body's proposed course of action to follow up on the complaint or appeal, within two (2) weeks of receiving a complaint or appeal. The certification body shall keep the complainant(s) informed of progress in evaluating the complaint/appeal, and shall have investigated the allegations and specified all its proposed actions in response to the complaint or appeal within three (3) months of receiving the complaint or appeal.</p>
	1.9.10 The decision resolving the complaint or appeal shall be made by, or reviewed and approved by, person(s) not involved in the evaluation related to the complaint or appeal.	14.2 The procedures shall allow the aggrieved party the opportunity to present the complaint or appeal to an entity (person(s), group or committee) which:

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
		14.2.3 was not involved in the certification activities (i.e. evaluation, decision making) related to the complaint or appeal.
	1.9.11 The certification body shall record and track complaints and appeals, as well as actions undertaken to resolve them.	
	1.9.12 A complainant shall be offered the opportunity to refer their complaint to ASI, if the issue has not been resolved through the full implementation of the certification body's own procedures, or if the complainant disagrees with the conclusions reached by the certification body and/ or is dissatisfied by the way the certification body handled the complaint. As the ultimate step, the complaint may be referred to FSC.	14.3 A party making a complaint shall be offered the opportunity to refer their complaint to FSC's dispute resolution process if the issue has not been resolved through the full implementation of the certification body's own procedures.
	<p>1.10 Publicly available information</p> <p>1.10.1 The certification body shall maintain, and make easily accessible on its website, the following:</p> <ul style="list-style-type: none"> a) information about the certification body's scope of FSC accreditation; b) a description of the sources of funding and general information on the fees charged to clients; c) a list of bodies providing outsourced services to the certification body for FSC accredited certification programs; d) a description of the rights and duties of clients, including requirements, restrictions or limitations on the use of the certification body's name and FSC trademarks and on the ways of referring to the certification granted; e) information about procedures for handling complaints and appeals; f) a link to the FSC certification database (info.fsc.org); g) a link to the FSC normative documents for certification, according to the certification body's accreditation scope. 	<p>9 Certification body: documentation (ISO/IEC Guide 65: 1996 (E) Clause 4.8)</p> <p>9.1 The certification body shall make the information specified in ISO/IEC Guide 65: 1996 (E) Clause 4.8.1 publicly available on its website.</p> <p>9.3 FSC specification to Clause ISO/IEC Guide 65: 1996 (E) Clause 4.8.1 a) A statement to the effect that the certification body's certification system is FSC accredited and operates under the authority of FSC satisfies this requirement in relation to its FSC accreditation. In the case of certification bodies that operate as part of another body (e.g. a government department, or as a department or program of a company) the certification body shall make information readily available that clearly explains the relationship between the certification body and this body.</p> <p>9.4 FSC specification to ISO/IEC Guide 65: 1996 (E) Clause 4.8.1 g) A link to the FSC database of registered certificates (www.fsc-info.org) satisfies this requirement in relation to its FSC accreditation.</p> <p>9.5 In addition to the requirements listed under ISO/IEC Guide 65: 1996 (E) Clause 4.8.1 the certification body shall publish or provide links to the following on its website:</p> <ul style="list-style-type: none"> a) The certification body's generic Forest Stewardship Standard; b) A list of the forest areas that the certification body has been contracted to evaluate for conformity with FSC

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
		<p style="text-align: right; color: red;">standards, provided in English;</p> <p>c) The locally adapted generic forest stewardship standard used for the evaluation of each certificate holder.</p> <p>3.8 The organizational structure of FSC accredited certification bodies shall be made available to stakeholders on request, including the names of members of the certification body's entities responsible for:</p> <ul style="list-style-type: none"> a) overall performance of the certification body's activities; b) reviewing the independence of the certification body (see Annex 1); c) formulation of policy matters which relate to the operation of the certification body; d) certification decision making; e) implementation of the policies of the certification body; f) resolution of complaints and appeals.
	<p>Part 2: General management system requirements</p> <p>2.1 Organizational structure</p> <p>2.1.1 The certification body shall document its organizational structure, showing duties, responsibilities and authorities of management and other certification personnel and any committees and entities under the organizational control of the certification body. When the certification body is a defined part of a legal entity, the structure shall include the line of authority and the relationship to other parts within the same legal entity.</p>	<p>ISO/IEC Guide 65:1996</p> <p>4.5.3 The quality system shall be documented In a quality manual and associated quality procedures, and the manual shall contain or refer to at least the following:</p> <p>e) a description of the organization of the certification body, including details of the management (committee, group or person) identified in 4.2 c), its constitution, terms of reference and rules of procedure;</p>
	<p>2.1.2 The management of the certification body shall identify the board, group of persons, or person having overall authority and responsibility for each of the following:</p> <ul style="list-style-type: none"> a) management system of the certification body (see Section 2); b) contractual arrangements; c) delegation of authority to committees or personnel (where applicable); d) personnel competence requirements (see 3.1 and Annex 2); e) reviewing the independence of the certification body; f) resolution of complaints and appeals; g) development of certification activities; 	<p>ISO/IEC Guide 65:1996</p> <p>4.2 Organization</p> <p>The structure of the certification body shall be such as to foster confidence in its certifications. In particular, the certification body shall</p> <p>c) identify the management (committee, group or person) which shall have overall responsibility for all of the following:</p> <ul style="list-style-type: none"> 1) performance of testing, inspection, evaluation and certification as defined in this Guide, 2) formulation of policy matters relating to the operation of the certification body, 3) decisions on certification,

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	<ul style="list-style-type: none"> h) provision of adequate resources for certification activities; i) development of certification requirements; j) evaluation (see Sections 4.3, 4.4 and 4.5); k) supervision of the finances of the certification body. 	<ul style="list-style-type: none"> 4) supervision of the implementation of its policies, 5) supervision of the finances of the body, 6) delegation of authority to committees or individuals as required to undertake defined activities on its behalf, 7) technical basis for granting certification;
	<p>2.2 Management system documentation</p> <p>2.2.1 The certification body's top management shall establish, document, and maintain policies and procedures for implementation of this standard and other applicable FSC requirements. The top management shall ensure that the policies and procedures are acknowledged and implemented at all levels of the certification body's organization relevant to FSC certification.</p>	
	<p>2.2.2 The certification body's top management shall appoint a management representative as having overall responsibility and authority to establish, implement and maintain the management system.</p>	
	<p>2.2.3 All documentation, processes, systems, records, etc. related to the implementation of FSC requirements shall be included, referenced, or linked to documentation of the management system.</p>	
	<p>2.2.4 All personnel involved in certification activities shall have access to the parts of the management system documentation and related information that are applicable to their responsibilities (personnel in the certification body's office and, as appropriate, in the field).</p>	<p>4.3 The certification body shall document the operational procedures and associated instructions to be followed to evaluate conformity with all FSC standards within the scope of the certification body's FSC accreditation. This documentation shall be available to the relevant personnel both in the certification body's office, and, as appropriate, in the field.</p>
	<p>2.2.5 The certification body shall have a quality manual and associated operational procedures for:</p> <ul style="list-style-type: none"> a) handling of applications; b) preparing and conducting audits (in pre-evaluation, main evaluation, surveillance and re-evaluation processes) according to the applicable FSC normative documents; c) conducting unannounced or short notice audits according to specified criteria and conditions; d) report reviewing and finalizing certification reports, (including public summary certification reports and surveillance reports); e) identification, management and tracking of nonconformities of 	<p>6 Certification body: quality system (ISO/IEC Guide 65: 1996 (E) Clause 4.5)</p> <p>6.1 The quality manual and associated procedures shall include operational procedures for:</p> <ul style="list-style-type: none"> a) handling of applications; b) preparing and conducting pre-evaluations (as applicable); c) preparing and conducting main and re-evaluations; d) reviewing and finalizing of certification reports (incl. public summaries); e) identification, management and tracking of nonconformities; f) all types of certification decision making;

	4.1.7 The certification body shall ensure that applicants for certification obtain a 'License Agreement for the FSC Certification Scheme' before entering into a certification agreement with the certification body (see Clause 1.2.2).	16.1 Applicants for FSC certification shall be required to obtain a 'License Agreement for the FSC Certification Scheme' before entering into a certification agreement with the certification body.
	4.1.8 The certification body shall require applicants for certification to disclose current or previous applications or certifications with FSC or other forestry certification schemes in the last five (5) years.	
	4.1.9 If applicable, the certification body shall obtain the latest available	

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	FSC audit report of the last five (5) years from the applicant and consider it in the certification process.	
	4.1.10 The certification body shall reject applications for certification of management units or sites that are already covered by a valid or suspended FSC certification, except where a certification transfer process according to <i>FSC-PRO-20-003</i> is ongoing.	
	<p>4.2 Application review</p> <p>4.2.1 The certification body shall review the information obtained from the applicant (see Section 4.1) to ensure that:</p> <ul style="list-style-type: none"> a) the information about the applicant and the processes is sufficient for planning and conducting the certification process; b) any known differences in understanding between the certification body and the applicant is resolved, including agreements on the applicable normative requirements; c) the scope of certification is defined; d) the certification body has the competence, capability and resources to perform the required certification activities. 	<p>ISO/IEC Guide 65:1996</p> <p>9.1 Before proceeding with the evaluation, the certification body shall conduct, and maintain records of, a review of the application for certification to ensure that</p> <ul style="list-style-type: none"> a) the requirements for certification are clearly defined, documented and understood; b) any difference in understanding between the certification body and the applicant is resolved; and c) the certification body has the capability to perform the certification service with respect to the scope of the certification sought and, if applicable, the location of the applicant's operations and any special requirements such as the language used by the applicant.
	<p>4.3 Audit</p> <p>4.3.1 The processes and products of a client shall be audited against the applicable requirements specified in the FSC normative documents. All interpretations of FSC requirements are at the sole discretion of the FSC International Center.</p>	<p>2.2 FSC specification to ISO/IEC Guide 65 Clause 4.1.3</p> <p>The requirements against which the products of an applicant shall be evaluated for the purpose of any claims relating to FSC or conformity with FSC requirements shall be those specified in FSC-approved standards (i.e. the certification body's locally adapted generic forest stewardship standard, an FSC-approved regional, national or sub-national standard, or FSC international standards). If explanation is required as to the application of these standards it shall be formulated and published by the relevant FSC-accredited body. All interpretation of FSC standards is at the sole discretion of the FSC International Center.</p>
	4.3.2 The certification body shall conduct audits for forest management certification in accordance with <i>FSC-STD-20-007</i> and related normative documents. In countries that are lacking a National Forest Stewardship Standard or an Interim National Standard, the certification body shall participate in the process of developing an Interim National Standard as specified in <i>FSC-STD-20-002</i> .	<p>17.1 The certification body shall conduct evaluations for forest management certification in accordance to FSC-STD-20-007.</p> <p>20.3 In the case of surveillance evaluations of forest management enterprises the documented procedures for surveillance evaluations shall conform with:</p>

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
		a) <i>FSC-STD-20-006 Stakeholder consultation for forest evaluation;</i> b) <i>FSC-STD-20-007 Forest management evaluation.</i>
		15.2 For the purpose of FSC forest certification the standard used shall be either the FSC-endorsed national or regional Forest Stewardship Standard whose scope covers the forest management units for which certification is sought, or, when no such standard exists, the certification body's generic forest stewardship standard locally adapted in accordance with the requirements of <i>FSC-STD-20-002 Part 2</i> .
	4.3.3 The certification body shall conduct audits for chain of custody certification in accordance with <i>FSC-STD-20-011</i> and related normative documents.	17.2 The certification body shall conduct evaluations for chain of custody certification in accordance to FSC-STD-20-011. 20.4 In the case of surveillance evaluations of chain of custody certificate holders the documented procedures for surveillance evaluations shall conform with: a) <i>FSC-STD-20-011 Chain of Custody Evaluations.</i>
	4.3.4 The certification body shall conduct audits for controlled wood certification in forest management organizations in accordance with <i>FSC-STD-20-012</i> and related normative documents.	17.3 The certification body shall conduct evaluations for controlled wood certification in forest management enterprises in accordance to FSC-STD-20-012. 20.5 In the case of surveillance evaluations of controlled wood (at FMU level) certificate holders the documented procedures for surveillance evaluations shall conform with: a) <i>FSC-STD-20-012 Standard for evaluation of FSC Controlled Wood in Forest Management Enterprises.</i>
	4.3.5 The certification body shall have an audit plan and shall share it with the client before the audit.	ISO/IEC Guide 65:1996 9.2 The certification body shall prepare a plan for its evaluation activities to allow for the necessary arrangements to be managed.
	4.3.6 The certification body shall assign an audit team in conformity with the requirements specified in Annex 3. The requirements also apply in the case of outsourced audit tasks.	16.2 FSC specification to ISO/IEC Guide 65: 1996 (E) Clause 9.3 The certification body shall assign lead auditors in conformity with the requirements specified in Annex 2. Evaluation teams shall comply with the requirements specified in Annex 3. Annex 2 and Annex 3 requirements also apply in the case of outsourced evaluation tasks.
	4.3.7 For forest management audits the following auditor rotation	

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	<p>requirements shall be applied based on number of certificate holders per certification body and country:</p> <ul style="list-style-type: none"> a) with more than twenty (20) certificate holders no auditor shall serve as a member of the audit team for more than three (3) consecutive audits of the same client; b) with eleven (11) to twenty (20) certificate holders no auditor should serve as a member of the audit team for more than three (3) consecutive audits of the same client. Where a client is audited by the same auditor on more than (3) consecutive audits, the certification body shall provide a justification why it was not possible or feasible to rotate the auditor and shall demonstrate how an impartial and objective evidence based audit is ensured; c) with less than ten (10) certificate holders auditor rotation after three (3) consecutive audits is recommended. 	
	<p>4.3.8 For all other types of audits the certification body should ensure that no client is audited by the same auditor on more than three (3) consecutive audits. Where a client is audited by the same auditor on more than (3) consecutive audits, the certification body shall provide a justification why it was not possible or feasible to rotate the auditor and shall demonstrate how an impartial and objective evidence based audit is ensured.</p>	<p>16.3 The certification body should ensure that no client is evaluated by the same lead auditor on more than 3 consecutive evaluations.</p>
	<p>4.3.9 The certification body shall provide all auditors with an up-to-date 'audit handbook' or equivalent which includes all the guidance necessary for the auditors to complete audits in accordance with the certification body's documented procedures. The audit handbook shall include instructions for auditors regarding at least:</p> <ul style="list-style-type: none"> a) the implementation of any checklists, guidance documents and interpretations of FSC normative documents; b) detecting, analyzing, grading, and addressing nonconformities; c) writing reports in accordance with applicable FSC requirements and certification body's procedures; d) procedures for the audit of trademark uses in conformity with FSC trademark requirements for on-product and promotional uses. 	<p>17.4 The certification body shall provide all auditors with an up-to-date 'evaluation handbook' or equivalent which includes all the guidance necessary for the auditors to complete successful evaluations (pre-, main-, surveillance-, and re-evaluations) in accordance with the documented procedures specified by the certification body. Guidance shall include procedures for the evaluation of the services under the scope of accreditation. The contents of the evaluation handbook shall include instructions for auditors regarding at least:</p> <ul style="list-style-type: none"> a) the implementation in the field of any checklists, guidance documents or options for interpretation of standards; b) the implementation of any additional standards or procedures, for example those relating to group certification, multiple site certification, etc.;

		<p>professional experience in a discipline relevant to the evaluation (e.g. ecology, forestry, sociology, economics, anthropology).</p> <p>1.5.4 At least five (5) years professional experience in an area of work relevant to the evaluation (e.g. forest management, postgraduate research, consultancy).</p> <p>NOTE: Lead auditor qualification for forest management evaluations satisfies the qualification requirements for controlled wood evaluations.</p> <p><u>FSC-ADV-20-004</u> Certification bodies may also use in-house trainers under the following conditions: - Training course agenda and course material require ASI approval in advance; - ASI reserves the right to witness the implementation of trainings at its sole discretion. NOTE: FSC will evaluate the implementation of the alternative training options after a period of 2 years. If applied rigorously and consistently, FSC may re-evaluate the formal ISO course requirement.</p> <p><u>Standard Interpretation on FSC-STD-20-001</u> (Published on 13.11.2013) The transitional exception for lead auditor training (FSC-STD-20-001 V3-0, Annex 2, Clause 1.2) has been extended until the next revision of FSC-STD-20-001 (scheduled for 2013/14).</p>
	<p>Table 4: Personal attributes for Forest Management and Chain of Custody auditor candidates and auditors (normative)</p> <p>NOTE: Personal attributes are characteristics that affect an individual's ability to perform specific functions. Knowledge about personal attributes of individuals enables a certification body to take advantage of their strengths and to minimize the impact of their weaknesses. Appropriate means for the assessment of personal attributes are personal interviews, assessment centers, psychometric tests and/or witnessing/supervision of personnel.</p>	

Color ranking	FSC-STD-20-001 V4-0	FSC-STD-20-001 V3-0 or other related normative documents as indicated, e.g. related advice notes and ISO/IEC Guide 65:1996
	<p>Most of the personal attributes as listed below were identified by <i>ISEAL</i> as being relevant for personnel involved in certification activities (see <i>ISEAL Code “Assuring Compliance with Social and Environmental Standards. Code of Good Practice”</i>). They should be considered in the assessment of personal attributes.</p> <ul style="list-style-type: none"> • ethical, i.e. fair, truthful, sincere, honest and discreet; • open-minded, i.e. willing to consider alternative ideas or points of view; • diplomatic, i.e. tactful in dealing with people; • collaborative, i.e. effectively interacts with others; • observant, i.e. actively aware of physical surroundings and activities; • perceptive, i.e. instinctively aware of and able to understand situations; • versatile, i.e. adjusts readily to different situations; • tenacious, i.e. persistent and focused on achieving objectives; • decisive, i.e. reaches timely conclusions based on logical reasoning and analysis; • self-reliant, i.e. acts and functions independently; • professional, i.e. exhibits a courteous, conscientious and generally business-like demeanour in the workplace; • morally courageous, i.e. willing to act responsibly and ethically even though these actions may not always be popular and may sometimes result in disagreement or confrontation; • culturally sensitive – i.e. able to understand behaviour rooted in cultural differences; • organised, i.e. exhibits effective time management, prioritisation, planning, and efficiency. 	
	<p>Annex 3 Audit teams</p> <p>1.1 The certification body shall have a process for selecting and appointing the audit team, taking into account the competence needed to achieve the objectives of the audit.</p>	
	<p>1.2 An audit team shall always include a qualified auditor and audit team leader.</p>	<p>17.8 On-site evaluation teams shall always include a designated team leader and a qualified lead auditor.</p>
